EDUCATION

SRM University, AP

B.Tech in Computer Science Engineering, CGPA: **9.25/10**

Aug 2024 – May 2028

Amaravati, AP

EXPERIENCE

Research Intern - Parallel Computing & Graph Algorithms

International Institute of Information Technology Hyderabad (IIITH)

May 2026 – July 2026

Hyderabad, India

- Optimized **BFS-based triangle counting** on large-scale graphs using **OpenMP** and **edge-level parallelism**, achieving **6x speedup** (900ms → 150ms) on the **SNAP ego-Facebook dataset** with 88K nodes and 1.3M edges.
- Implemented **horizontal edge filtering** to reduce thread synchronization overhead, improving scalability across **8+ CPU cores** while minimizing lock contention and cache-coherency overhead.
- Developed and documented parallel algorithm optimizations, performance benchmarks, and scalability analysis under the supervision of **Prof. Kishore Kothapalli**, Dean of Academics.

AI Automation and Web Development Intern

PIVOT Automations

Feb. 2026 – Apr. 2026

Remote

- Built **20+ n8n automation workflows** reducing manual process time by **40%** across client ticket routing, document processing, and email automation pipelines.
- Designed and deployed **REST APIs** supporting **1,000+ monthly automated executions** with fault tolerance, retry mechanisms, asynchronous notifications, and error handling.
- Integrated **3+ third-party SaaS platforms** including Slack, Google Workspace, and ticketing systems using custom **JavaScript handlers**, improving data consistency and reducing human error by **95%**.

TECHNICAL PROJECTS

Recrutva - Hiring Platform | [GitHub](#) | [Live](#)

- Architected a full-stack hiring platform using **Next.js**, **TypeScript**, **Node.js**, **PostgreSQL**, and **Redis**, implementing end-to-end candidate workflows from resume screening to interview evaluation.
- Engineered backend services for **resume matching**, **skill assessment**, and **voice interviews**, integrating external APIs with asynchronous processing, structured data pipelines, and persistent application state.
- Improved backend **reliability and scalability** using **Redis rate limiting** (100 req/sec), database indexing for **500+ concurrent users**, automated E2E testing (95% coverage), and **GitHub Actions CI/CD**.

Briefly - Personal Productivity Assistant | [GitHub](#) | [Live](#)

- Built a full-stack productivity assistant using **Next.js**, **TypeScript**, and **Node.js**, integrating **Gmail**, **Google Calendar**, **Google Drive**, **GitHub**, **Discord**, and **Telegram** through **OAuth 2.0** and REST APIs.
- Architected a **multi-service orchestration engine** handling concurrent API requests, response aggregation, error isolation, and state management across **6+ external services** using **PostgreSQL**, **Drizzle ORM**, and **async/await**.
- Implemented automated **integration and E2E testing**, containerized the application with **Docker**, and configured **GitHub Actions CI/CD** for automated testing, builds, and deployment.

JobClarity - Job Fraud Detection Platform | [GitHub](#) | [Live](#)

- Developed a **FastAPI REST microservice** for real-time job classification using an **XGBoost model** trained on **17,880+ job postings**, achieving an **82% F1-score** through feature engineering and hyperparameter tuning.
- Built an end-to-end ML pipeline using **Python**, **Pandas**, **NumPy**, **scikit-learn**, **XGBoost**, and **MLflow**, with **SHAP** for model interpretability and experiment tracking.
- Integrated the inference service with a **Next.js frontend** through REST APIs, implementing **Docker containerization**, **inference caching**, and **GitHub Actions CI/CD** for automated testing and deployment.

SKILLS

- Languages:** Java (Primary), TypeScript, JavaScript, Python
- Frameworks:** React.js, Next.js, Node.js, Express.js, FastAPI
- Backend & Databases:** REST APIs, PostgreSQL, MongoDB, MySQL, Redis, Drizzle ORM, OAuth 2.0
- Cloud & DevOps:** Docker, AWS (EC2, S3), GitHub Actions (CI/CD), Vercel
- Testing & Tools:** Vitest, Integration Testing, E2E Testing, Git, GitHub, Linux, Postman
- AI/ML:** scikit-learn, XGBoost, MLflow, SHAP, Feature Engineering
- Core CS:** Data Structures & Algorithms (Java), OOP, Operating Systems, DBMS, Computer Networks, Parallel Computing

ACHIEVEMENTS

- </> LeetCode** - Solved **355+ problems** across Arrays, Linked Lists, Trees, Graphs, and Dynamic Programming ([Profile](#)).
- Open Source** - Contributed **45+ pull requests**, with **18+ merged**, across **5+ repositories** through **GSSoC** and **OSCI**.
- Smart India Hackathon 2025** - Cleared internal rounds, finishing among the **Top 45 teams** out of **600+ teams**.
- Reckon 7.0 Hackathon** - Secured **Runner-Up** in the **Simpli AI** track for developing an AI-driven solution.
